### **Origin of the name of the historical sites in Rimini**

Constructed between 14 and 21 A.D., at the beginning of the via Emilia, the Tiberius Bridge has long been admired by visitors to the city: among which Andrea Palladio, who refers to the bridge in his famous essay on architecture as "the most beautiful and most worthy of consideration".

The monument stands out for the remarkable geometry of its arches, which reflect the water below, making a perfect circle.
