- Front projection system in various sizes and video projector for every part of the room
- 2 component video cameras and 2 video composite cameras
- Track, pulleys and fixed hooks for suspended rigging in any part of the room
- Extensive audio, video and lighting connections
- Fixed and mobile video production
- 4 translation booths with simultaneous translation service of up to 16 languages
- High density Wi-Fi coverage
- LCD monitor on both Presidential table and podium
- Goods lift for rapid handling of equipment
- 4 entrance points to the room
- Customisable digital signage at each entrance to room

## PROJECT IMPLEMENTATION AND DEVELOPMENT ON REQUEST:

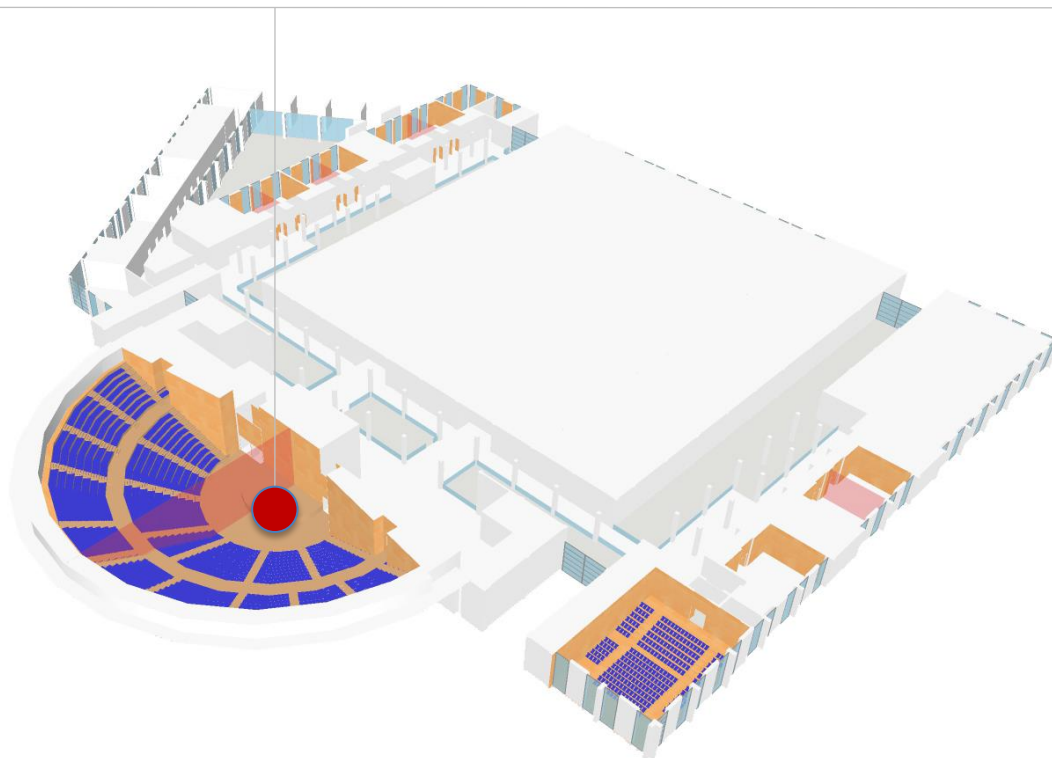

- Other set-up options available based on feasibility

### The origin of the name

The Anfiteatro Hall takes its name from the ancient Roman amphitheatre built under the rule of the Emperor Hadrian (II century A.D.) to host gladiator combats. The remains of the building were brought to light in the 19th century: only a small part of the massive structure with an elliptical floor plan that held up to 15,000 spectators on its steps and whose arena was not much smaller than that of the Coliseum. The view of the city from those very steps at that time was rather different to the modern panorama: on one side lay the populated area, on the other, the river Ausa flowing down to the port and the nearby coast.
