PALACONGRESSI
DI RIMINI

FARO ROOM

TECHNICAL SHEET

FARO ROOM

MAIN CHARACTERISTICS

An elegant and functional room with high quality finishings and furniture throughout.
Soundproof and sound-absorbing beech wood walls and cherry wood floors.
Standard, ready to go set up and lay out.
Thonet linking lecture chairs with maximum comfort can be provided.
The room is located on the first floor.

FEATURES

• Natural light and remote controlled blackout facilities
• Dimmer lights for selected areas
• Presidential table and podium
• Audio amplification system with wired and radio microphones
• Screen and hanging video projection system for front screen projection
• Electrical connections and internet sockets in underfloor outlet boxes or wall outlets
• High density Wi-Fi coverage
• LCD monitor on both Presidential table and podium
• 1 entrance point to the room
• Customisable digital signage at each entrance to room

PROJECT IMPLEMENTATION AND
DEVELOPMENT ON REQUEST:
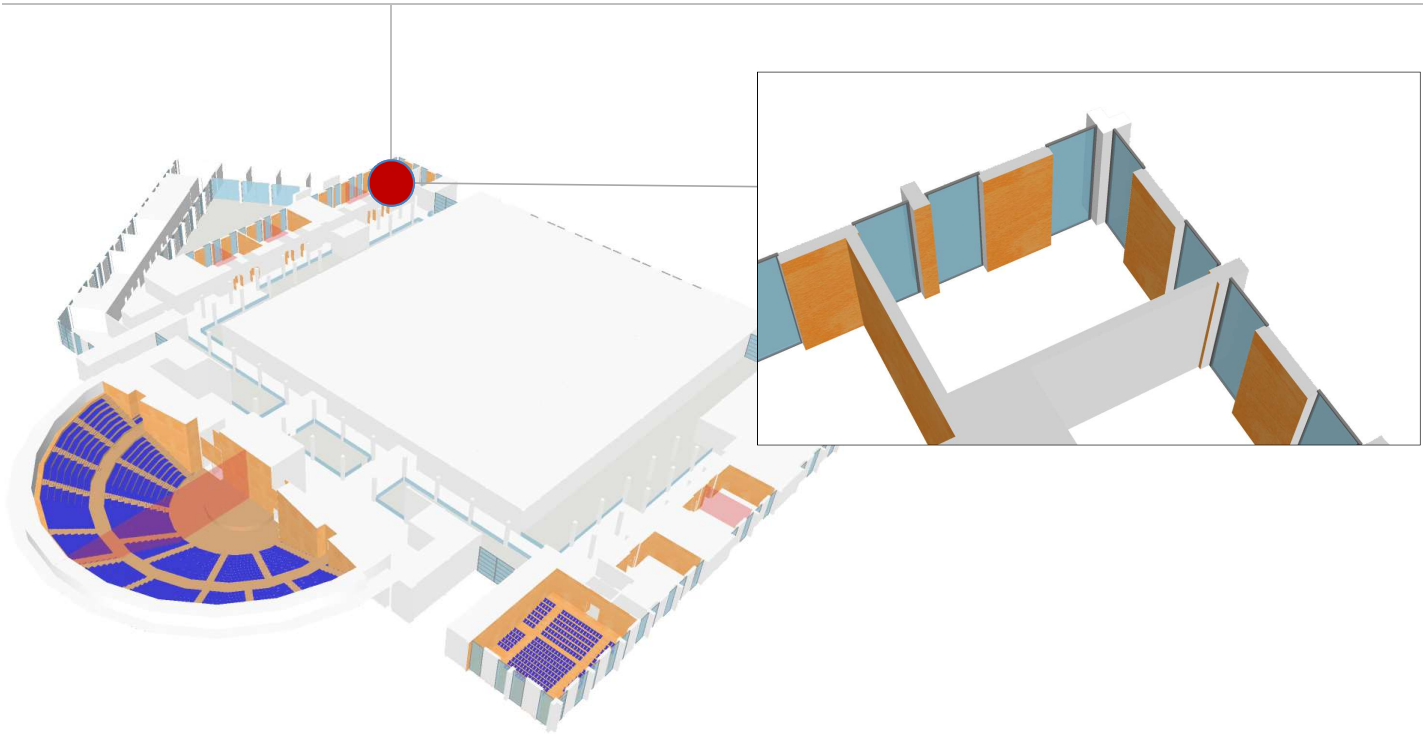

• Other set-up options available based on feasibility

The origin of the name
The Faro Room takes its name from the the old Lighthouse, built by Rimini architect Giovan Francesco Buonamici in 1763, completing the design of Luigi Vanvitelli, who thirty years previously had built it on stilts beyond the head of the pier. The slender upper part nestles into a massive structure, leaving no doubt that it was both a light for sailors and a lookout for pirate ships.
Due to the rapid advancement of the coastline, today the Lighthouse has become part of the urban landscape. With your back to the sea, its 27 metre profile is almost aligned with that of the skyscraper, a modern reinforced concrete 33-storey building, erected in 1961.
